

# Biorefining & Bioenergy

AN ENTERPRISE IRELAND  
& IDA IRELAND INITIATIVE

“Providing cutting edge R&D outputs to support a sustainable and competitive Irish biomass industry.”

### What we can do for you

- Participative Research Projects – participate with renowned experts in research projects on topics of interest that you decide

Public Projects where participation is available to Members, for moderate fees, with preferential access to results, information and licensing rights from the output of the project, or

Private Research Projects for Sponsors – where participation is negotiated directly by the Sponsor of the project, and where the activities undertaken, management of the project and rights to the results are decided between the sponsor and the research provider

- Research Partners for EU Research Grant Applications – Framework 7 & InterReg Programmes – successful applications may have up to 75% of the qualifying research costs supported by a research grant (funding contribution required)
- Preferential access to information and members only library
- Events Calendar & Newsletter
- Advocacy re Policy/Regulation issues
- Voting rights for electing Directors of CCBB

### For Supplemental Fees to Research Providers

- Preferential licensing of proprietary technologies
- Consultation/expert scientific analysis of issues/processes and materials
- Supply of expert staff and laboratory resources

### Future Benefits

- Access to world class pilot plant for testing/commercialisation  
The CCBB is applying to develop a world class pilot plant with numerous conversion technologies all in 1 location in order to be able to link them together into an industrial process and demonstrate viability and scalability of core research

### Who Should Join

- Companies and organizations involved in or interested in collection, production and/or processing of biomass for energy or industrial products
- Farmers groups, agricultural equipment suppliers or companies with biomass bi-products that may be useful for conversion into energy or materials
- Manufacturers of bioenergy or biorefining equipment
- Energy companies and large energy end-users
- Independent consultants and professionals in the biomass, bioenergy or biorefining sectors
- Organizations and individuals interested in promoting renewable energy use.

### Annual Membership Fees

SME's and Individuals - €500  
Corporate Membership - €2,000
